

BRACE FOR POTENTIAL

# STRIKE

at

# Metro-North!

The MTA is unnecessarily driving the Transport Workers Union workforce to shutdown Metro-North. Our 560 Members have provided vital safety functions at the railroad for decades and throughout the recent pandemic. MTA negotiators are bargaining in bad faith, lying and trying to cheat TWU members over what comes down to a measly \$500.12 per worker! This while it continues to spend billions of taxpayer dollars on inept consultants and poor operational decisions affecting its ridership year after year.

**Our Members, once hailed as Heroes and Essential Workers, have gone long enough without the raises they need to provide for their families and, when released, are prepared to STRIKE in order to do so!**
